

Bid farewell to bulky file cabinets. *CD Total Recall* from Custom Computing offers a whole new way to save time and space in your office. Using innovative collection software, *CD Total Recall* gives you the power to gather and compile your clinic's entire year-end report, store it on your desktop for easy access and transfer all of your data onto a single CD for simple, safe storage. In just a few steps, you can alleviate the need for file cabinets, microfiche equipment and other outdated storage methods.

Accessing your information is a breeze. Using *CD Total Recall's Monarch™* software, you can search and organize archived information using any number of criteria—*patient name, date, account number*—without leaving your desk. This comprehensive access and analysis tool gives you the power to view, sort, filter, summarize and export your information to everyday programs like Microsoft Word® and Excel®—even transform output files into live data onto your PC! Having *CD Total Recall* means never having to navigate thick reports or re-key spreadsheet data again.

## Scrap your old paper-filing system.

- Integrates data within desktop applications like Microsoft® Office
- Leverages existing reports and reporting methods
- Alleviates the need to re-key data from printed reports
- Faster, easier way of accessing report data than traditional methods
- Offers superior storage capabilities
- Increases staff productivity and efficiency

Isn't it time to scrap your old paper system? Contact Arthur Alt at 1-800-279-1222 or alt@cccrcorp.com to learn more about *CD Total Recall* today.
